

# Tracker

BUILT WITH  ANALOG DEVICES

## Product Feature

- Smart-size and light-weight
- Real-time and high accuracy auto-tracking
- Compatibility with a wide variation of flight controllers
- Up to 3GHz frequency supported

## Product Parameter

Parameter	Indicator
Yaw stability enhancement accuracy	<0.5°
Pitch stability enhancement accuracy	<0.1°
Yaw rotation range	Unlimited
Pitch rotation range	-15~135°
Maximum horizontal turning rate	300°/s
Maximum vertical turning rate	60°/s
Weight	2.6kg
Maximum torque	300 N.cm
Operational voltage	DC 12V~15V
Average power consumption	15W
Working temperature	-20~60°C
IP level	65
Working humidity	20%~70%
Interface	TTL serial
Supported protocol	MavLink, NMEA-0183
